Professional Summary

Application Developer focused on backend systems, experienced in C#/ASP.NET and real-time payment systems. Interested in secure and reliable systems, with hands-on experience in Linux, Docker, Proxmox, pfSense, VPNs, and homelab infrastructure.

Education

Bachelor of Computer Science, University of Primorska, FAMNIT

Oct 2022 – Sep 2026

High School Diploma, Gymnasium Dobri Daskalov – Kavadarci

Sep 2018 – May 2022

Experience

Application Developer, Dinit Card Services

May 2025 – Present

- Extended backend payment gateway services handling production traffic (C#/ASP.NET framework)
- Migrated messaging infrastructure from RabbitMQ to Azure Service Bus, improving system maintainability
- Integrated real-time Flik payment flows into an existing pipeline, ensuring compatibility with existing authorization

GDG on Campus Lead, Google Developer Group on Campus University of Primorska

Oct 2025 – Present

- Organize and lead technical workshops, talks, and hackathons for University of Primorska students

Full Stack Developer, Dinit Card Services – Summer Camp

Jul 2023 – Aug 2023

- Implemented authentication functionality using sessions, cookies, and token-based mechanisms
- Developed backend functionality in Java Spring Boot while collaborating in an agile team environment
- Used Git and GitHub for collaborative development, version control, and code integration

Projects

Virtualized Homelab Infrastructure and Network Management

Aug 2024

- Designed and maintained a virtualized homelab environment using Proxmox VE
- Configured network segmentation, firewall rules, and VPN access using pfSense for isolated test environments
- Deployed and managed Linux-based services and virtual machines for networking and security experimentation

zMix – Peer to Peer Onion Network

Nov 2025

- Designed a peer-to-peer onion-routing network simulating Tor-like message propagation
- Implemented asymmetric encryption and Diffie–Hellman key exchange for secure node communication
- Containerized distributed nodes using Docker and orchestrated local deployment with Docker Compose

Remember Me – Smart Glasses Assistant (DragonHack 2026)

Apr 2026

- Developed a real-time assistive system for dementia patients using live face detection and facial embedding models
- Implemented computer vision pipeline to identify individuals and display contextual AR-style overlays
- Integrated multiple services into a working end-to-end prototype within a 24-hour hackathon constraint

Skills

Languages Full Professional English, Limited Working German and Slovenian, Native Macedonian

Programming & Backend: Java, C#, C/C++, JavaScript/TypeScript, SQL, Bash, ASP.NET, Spring Boot, Express.js

Infrastructure & DevOps: Linux, Docker, Proxmox, pfSense, VPNs, Git, GitHub, Active Directory (learning)

Awards

Best Teamwork Award – DragonHack 2026

Apr 2026

Recognized for outstanding collaboration, communication, and overall team performance during the 24-hour Hackathon

2nd Place – FAMNIT Hackathon 4.0

May 2025

Secured 2nd place for developing a digital twin-based solution for Luka Koper at FAMNIT Hackathon 4.0

2nd Place – Primatijada 2024

May 2024

Achieved 2nd place at Primatijada 2024, a regional student sports-scientific event held in Trebinje, Bosnia and Herzegovina

1st Place – National German Language Competition

Apr 2019

Won 1st place in a nationwide German language competition in North Macedonia
